Product Description

If you're looking for a pen that will turn heads, then you've found it here. This pen is made from bronze box elder wood burl and is paired with the Art Nouveau style body design. The wood has beautiful bronze swirls with lighter tan grain patterns and "islands" that polished up to a high luster.

The pen is in the Art Nouveau style with custom casted 3-D design components for the accent rings, band, and cap. It has a twist mechanism that extend the Parker-type cartridge. It measures 5.25 inches in length.

After turning, the pen has been sanded and polished using a 16 step process with cyanoacrylate (CA) to deliver a hard and durable and mirror finish that will last for years to come.

The pen you see in the image is the one you will receive. You will also receive a FREE case like the one in the image to protect your pen or to present as a gift, along with a certificate of craftsmanship and authenticity and instructions for caring for your pen.

Thank you for visiting!
