## Product Description

Let a man start off his day with class with this handcrafted Mach 3 razor with a Bubinga wood handle and matching wooden stand. The deep rich red/brown color of the wood is simply beautiful. The razor is 5-1/2" long and the stand is 5-1/2" with the base being a weighted 2-3/4" wide. It is made to fit any of the Mach 3 razors.

Don't worry about getting this razor wet and damaging the beautiful wood! Its finish is made of Cyanoacrylate (i.e. CA or Superglue) which is durable, has a mirror-finish, and cannot be penetrated by water. Just wipe the handle dry after each use. So take confidence in the fact that your razor's finish will last you for years of daily shaving! (But just be wary of other types of finishes applied to custom wooden razor handles that you may find on the market!).

The razor and stand pictured is the one you will receive (however the razor head is not included). You will also receive a certificate of authenticity.

Thank you for visiting!
