Product Description

The hexagon designed Chrome-plated hardware on this Vertex Supreme Roller Ball pen not only takes on the character of ruggedness and utilitarian-style...It is stylish, stately, charismatic yet bold and pleasing to use. The ink derives from a 0.5 mm Schneider Topball 850 style refill from Germany. It demonstrates fine, clean black lines as it glides along effortlessly.

But what makes this pen truly mesmerizing is its unique magnetic cap. The cap easily posts onto the nib and back of the pen without the use of threads. And the long single tube design allows you to really show off the grain or the wood.

The material used for this fine writing instrument is made primarily of black volcanic ash and clay from Australia. It is a unique ceramic composite from M3 Technologies. The material is strong, shatter and heat resistant and turns to a luxurious shine. The wood was finished with a durable 16 layer cyanoacrylate (CA) finish that ensures its scratch resistance and that the pen will be enjoyed for generations.

You will receive a FREE gift box along with your purchase plus a Certificate of Authenticity. Most orders are shipped within 24 hours after purchase. Thank you for visiting!
